

User Guide

FlowSync PM — Role-based guide · July 2026 edition

FLOW SYNC PM · Registered Merchant No. 1552654-0010 · flowsyncpm.com

Available languages: English and Spanish (set per user). / Disponible en español.

1. Getting started (all roles)

1.1 Signing in

- Go to flowsyncpm.com and sign in with your email and password, or with your corporate Microsoft or Google account (SSO).
- Forgot your password? Use "Reset password"; you'll receive a link valid for 1 hour.
- Enable two-factor authentication (2FA) under Settings → Security. Recommended for all users.

1.2 Workspaces

- Your organization operates inside a workspace. If you belong to several, switch with the workspace selector in the top bar.
- Everything you see (projects, reports, notifications) belongs to the active workspace.

1.3 Language

- Switch between English and Spanish in your profile. The entire interface, including reports, follows your selection.

2. Workspace Administrator / Owner

2.1 Initial setup

- Settings → Workspace: name, logo, and general preferences.
- Settings → Team: invite users by email and assign their workspace role (Admin, PM, Member, Viewer, Client, PMO Director, Program Manager, Executive).
- Settings → Billing: plan, seats, and payment method.

2.2 Ongoing management

- Review the audit log to see actions taken across the workspace.
- Adjust roles as responsibilities change; permissions apply immediately.

3. PMO Director / Program Manager

- Portfolio: consolidated view of all projects with status, health, budget, and progress.
- Executive reports: generate portfolio or project PDF reports for steering committees; report history keeps every generated version.

- Governance: oversee escalated risks and issues, pending decisions, and approvals.
- Workload: use the heat map to spot over-allocation across projects.

4. Project Manager (PM)

4.1 Creating a project

- Projects → New: set name, methodology (Waterfall, Agile, Scrum, or Hybrid), dates, and sponsor.
- Add members with their project role (PM, PMO, Sponsor, Stakeholder, Team Member, Product Owner, Business Analyst, Tech Lead, Scrum Master, Client, Auditor, among others) and their availability percentage.

4.2 Importing an existing plan

- In the project, use Import: upload your plan in Word, Excel, or PDF.
- The platform extracts tasks, phases, risks, issues, decisions, and budget lines as suggestions.
- Review and click "Apply" — each suggestion becomes a real project item.
- **OCR (Business plan):** scanned PDFs are also processed (up to 15 pages per document and 200 pages per month).

4.3 Day-to-day management

- **Tasks:** create, assign, estimate, and order tasks by phase; update statuses as work progresses.
- **Risks & issues:** log with severity and owner; escalate when needed.
- **Decisions:** record each decision with context and owner.
- **Budget:** capture budget lines and actual costs; the platform computes earned value (PV, EV, AC, CPI, SPI).
- **Documents:** attach project files under the Docs tab.
- **Reports:** generate the project PDF report in one click from the reports tab.

5. Team Member

- My Work: see the tasks assigned to you across all projects.
- Update status and remaining effort on your tasks; this feeds the workload map and earned value.
- Report risks or issues you spot; the PM will triage them.
- Notifications alert you to assignments, mentions, and relevant changes.

6. Sponsor / Stakeholder / Executive

- Decision-oriented read access: project status, health, budget, and earned value without operational noise.
- Review the PDF reports published by the team.
- Participate in decisions and approvals when requested.

7. Client / External resource

- Limited access only to the projects you were invited to, with the information the PM chooses to share.
- Ideal for end clients, consultants, and auditors.

8. Support

- **Email:** support@flowsyncpm.com
- Include your workspace name and, if applicable, the project and a screenshot.
- See support hours and service levels in the FlowSync PM Service Policies document.
